Let **JUKI** support your non-sewing works, as well. We can deliver solutions for any kind of work performed in a sewing plant.

JUKI aims to deliver a "**One-stop service**" that provides every type of equipment and technology used in a sewing plant. JUKI will continue making its best efforts to hold the trust of its customers as a provider of not only sewing machines, but all the machines necessary for printing, automatic cutting, and bonding (no sewing) required before sewing, as well as high-quality technical services for all of the equipment JUKI provides for sewing and non-sewing operations.

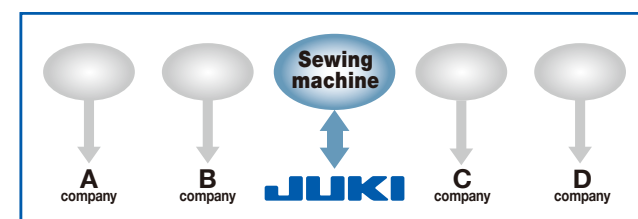

JUKI One-stop service

After-sale maintenance only JUKI can provide

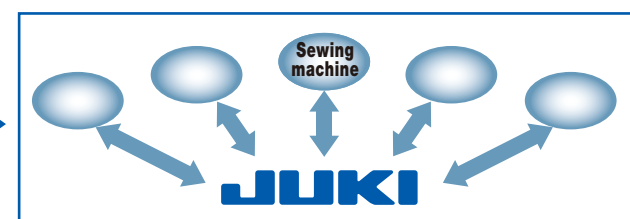

Based on the wealth of experience garnered over its 50 years as a service provider, JUKI assign service groups of professional servicepersons to fine-tune installations and troubleshoot at customer plants all over the world. JUKI understand the importance of providing service / support activities that minimize down-time of non-sewing products as well as the industrial sewing machines used in customer plants.

Conventional support/service style

When any type of maintenance is required, the customer must contact the various companies that sold the customer its machines.

Proposed support/service style

When any type of maintenance is required, the customer only needs to contact JUKI. JUKI will provide all necessary support / service for the machines and equipment in the customer's plant.

JUKI's global network

JUKI develops sales and support activities that meet the trust and expectations of customers around the world.
